## Assignment #1

Adapted from work by Peter Heusch

### Exercise 1.1: Terminology

For each of the pairs of concepts listed below, explain differences and similarities. When do we use/need one and when the other?

1. Software Testing—Debugging
2. White Box Testing—Black Box Testing
3. Safety—Security
4. Defect—Failure in IEEE nomenclature
5. Defect—Failure in Zeller's nomenclature

### Exercise 1.2: Poor Requirements

The lecture slides list requirements for requirements. For each of the listed properties, give a requirement that violates it. (You may reuse requirements for multiple properties.

Be ready to explain, how the property is violated.
